

Clear your ServiceNow backlog — without the three-month hire.

Optivo Tech supplies vetted ServiceNow developers and project pods to consultancies, staffing partners, and platform teams. Live on your platform in five business days. A delivery lead who owns the outcome. A risk-free first week.

THE PROBLEM

Work outpaces capacity

- **A backlog that never clears.**
Requests, automations and clean-ups sit behind the day-to-day.
- **A three-month hunt for talent.**
Every ServiceNow hire eats a full quarter before the work starts.
- **One developer, every deadline.**
Delivery — and the client relationship behind it — rides on a single, overloaded person.

WHAT WE DELIVER

A team that plugs straight in

- **Vetted developer, live in 5 days.**
Senior ServiceNow dev or admin matched to your work.
- **Clean, governed delivery.**
Best-practice config, proper update sets, documented.
- **One accountable lead.**
A delivery lead who owns the engagement, never a ticket queue.
- **Weekly progress reporting.**
What shipped, what's next, where the work stands.
- **Flexible scaling.**
Scale up, down or pause with notice — no fixed-length lock-in.

WHO WE WORK WITH

Consultancies & staffing firms	Independent consultants	Platform teams
Firms placing or delivering ServiceNow work — need trusted subcontract talent on demand.	Freelancers who win work but lack the hands to actually deliver it.	SMB and mid-market teams with more backlog than the in-house team can absorb.

WHAT WE GUARANTEE

- ✓ Risk-free first week. If you're not convinced, you pay nothing.
- ✓ Clean, governed configuration. No upgrade-breaking shortcuts.
- ✓ A single named delivery lead. Not a faceless queue.
- ✓ Developer live in 5 business days from first call — or we don't bill until they are.
- ✓ Weekly written status report. What shipped, what's next.
- ✓ Scale up, down or pause with notice. No fixed-length lock-in.

Let's scope the work.

A 20-minute call is the fastest way to see if we're a fit. No pitch — straight conversation.
